

Director's Epistle

Dear Readers, The year 2014 was a good year for Interarch... we have been able to secure more than 300 orders across India from clients like Ultratech Cement Limited, Hindustan Unilever Ltd, Fortis Hospitals, JCB India, Perto India Pvt Ltd, JSW Steel, TATA Motors and many more.

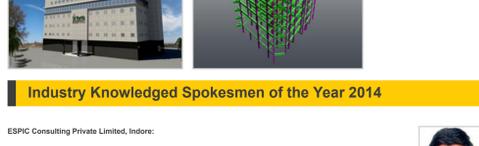

This edition of the Newsletter will showcase many innovative solutions accomplished by Interarch this year right from Multi-story buildings to a 99 M Clear-Span in installation of 129 MT crane at a height of 22 M.

We are happy to announce, the year we have been successfully able to convert RCC and site fabricated steel applications to Pre-Engineered steel in new industries like steel, power & cement. We are also pleased & appreciate the fact that the consumers are getting ahead of the price sensitive market and are considering companies providing better and quality product.

We would like to wish all our readers a happy and prosperous New Year 2015!

Thanks & Regards, Arvind Nanda & Gautam Suri, Founder Directors - Interarch Building Products

Innovations at Interarch in the year 2014

Industry Knowledge Spoken of the Year 2014

ESPC Consulting Private Limited, Indore: "Pre-Engineered Building players should have flexible approach towards site welding of crucial welded joints especially in heavy industries. While focusing on Green Building they suggested that bright color sheet should be used and redundant glazing should be avoided to reduce internal temperature which leads to decrease in energy consumption. However glazing/transparent sheets should be used at appropriate places to make use of daylight."

VMS Engineers & Design Services: "We feel that pre-engineered buildings have more scope than before and will be further increase in the future. Now pre-engineered steel buildings are being used for new applications like constructions of multistory buildings in India."

Mulhotra & Associates: "I believe that in future pre-engineered technology will be extensively used for residential as well as commercial accommodation in form of high rise buildings. Further Commenting on the green building aspect he expressed, the scope of Green buildings is very vast for the Indian market. It proves to be relevant and beneficial as there is a lot of scope of scrap material to be used. Conservation of resources and energy is very crucial element now. Green buildings have always been part of the Indian ethos. The large scale adoption today comes naturally for Indian designers and architects."

Certified Builders Program Initiatives by Interarch in 2014

Interarch during the year executed many campaigns at site to educate and train partner builders to enlighten them with some very useful and effective project management tips to ensure the maximum quality and best safety conditions for workers at site

Correct Procedures for handling materials: Interarch illustrated some best practices to be followed at site to keep the environment clean like emission controls, energy saving tips, water wastage avoidance tips, recycling of wooden battens, approved treatment of excavation materials and/or site disposal using water based paints rather than solvent based etc.

Tips for workers working at site during summer month: To ensure the healthy conditions of the workers during summer Interarch provided some self-care tips for the workers on site like wearing light colored clothes, avoiding alcohol, maintaining optimum level of water in the body, taking breaks to avoid over-heating and stress etc.

Tips for working during monsoon seasons: Provide employees with adequate facilities and equipment such as safety helmets, raincoats, gumboots with anti-slip sole to ensure their safety at work. Don't be in hurry, be cautious and move slowly & carefully on wet and slippery surfaces. Avoid walking through puddles no matter how shallow they appear. Do not use damp nylon belts for lifting the material as they are to prone wear off and break. Use only appropriate wire ropes for lifting the material. Check all machinery controls to ensure proper operation before use. Ensure the scaffolding, rope ladder foot holds are free from any slip hazards or loose soil. Stay away from power lines and poles at the site, always treat them cautiously as they are dangerous. Be alert for damaged plugs and cords on electrical appliances and fixtures. Don't touch or climb them if they are damaged. All electrical work should be carried out using appropriate rubber mats. Ensure proper drainage of still water which is a breeding place for mosquitoes and empty water from outdoor items such as old tires, cans and flower pot bases.

Safety Campaign: Like supervisors should ensure requisite safety inspections after work resumes, to carry out the outdoor installations, such as scaffolding, temporary supports, cranes, suspended working platforms, power supply plant, etc. before they are put into use.

- Major Project Wins During 2014: Mangalam Cement Ltd, Rajasthan; Glenmark Generals Ltd, in M.P.; Radkai Overseas Pvt. Limited, U.P.; Tata Motors Limited, Uttarakhand; India Land & Space Infrastructure Pvt. Limited, Haryana; D. B. Corp Limited, Madhya Pradesh; Lupin Limited, Maharashtra; Ultratech Cement Ltd, Gujarat; Metro Tyres Limited, Punjab; Asian Paints Limited, Haryana; Fairdeal Jumbo Packaging Pvt. Ltd, Gujarat; BASF India Limited, West Bengal; APL Apollo Tubes Limited, Tamil Nadu; Perto India Pvt. Ltd, Rajasthan; JCB Steel Limited, Karnataka; Indoff Industries Limited, Gujarat.

- Major Project Completed During 2014: Mahindra Two Wheelers Ltd, Madhya Pradesh; Havells India Limited, Uttar Pradesh; Hitachi Plant Technologies India Pvt. Limited, TN; JCB India Limited, Rajasthan; Gramin Industries Limited, Madhya Pradesh; APL APOLLO Tubes Limited, Uttar Pradesh; SMS India Private Limited, Odisha; Mahindra Aero structures Pvt. Limited, Karnataka; ITC Essentra Limited, Karnataka; IndoSpee Industrial & Logistics Parks Limited; Hindustan Uniliver Limited, West Bengal; India Private Motors Private Limited, Tamil Nadu; SMS India Private Limited, Odisha; Honda Cars India Ltd, Rajasthan; Ultratech Cement Limited, Chhattisgarh.

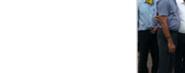

Awards & Recognitions Received in 2014

Interarch has been awarded as Safety Conscious Contractor during the safety month for JCB, India. Interarch received Certificate of Appreciation by M/s.Tata Motors Ltd - Patnagar for promoting higher standards of competence & compliance for occupational health & safety during 3rd quarter meet 2013-14.

Interarch has been awarded Best PEB Project of the year by Construction Week awards 2014 for delivering a project for JCB India in Rajasthan 2014. Interarch has been awarded certificate of appreciation from API Apollo Tubes Ltd. for achieving the goal of zero accident at site.

CSR at Interarch

National Safety Week: Interarch celebrated National Safety Week at various ongoing sites in the country. Where in workers were told the importance of National Safety Week, various trainings on Unloading of Material, Work at height, Electrical Hazard etc being held during the week.
