

Interarch Building Products Newsletter

Issue 04, Vol. 1
— January 2011

Arvind Nanda
Founder Director & CEO

Dear Reader,

Best wishes from the Interarch family on a very happy and a prosperous new year! We hope that our latest endeavour in the form of newsletters is helping you to stay abreast with the latest developments in the Industry and at Interarch.

2010 has been a breather for the infrastructure industry as the market opened up and adapted itself to soaring steel prices. The government's plan of investing USD 1 Trillion in the 12th five year plan that ends in 2017 for the infrastructure industry enhances our ability to attain robust growth.

The beginning of 2011 has been fruitful for Interarch with some respectable projects won right at the start of the year. This volume of our newsletter will take a look at growth sectors which can benefit from pre-engineered infrastructure as well showcase our ability to adapt our structures from large scale projects to micro retail units.

We hope that you have an interesting read in this volume. Please feel free to send us your feedback.

Best Wishes

Gautam suri & Arvind Nanda

Founder Director & CTO

Pre-Engineered Metal Building Systems

Pre-Engineered Metal Building Systems

Interarch pre-engineered metal buildings are tailor-made solutions to a customer's needs to meet exact requirements. These buildings are flexible enough to suit different building dimensions & are easily scalable.

The PEB systems can be applied on various formats according to the needs of the customers. Some of the key application areas are -

- Manufacturing facility
- Workshop
- Airport Terminal Building
- Petrol Retail Outlets & Stations
- Ancillary buildings & Auditoriums
- Foot over bridge
- Multilevel Car Parking
- Office building

The Interarch Advantage:

- Buildings are designed and manufactured in accordance to International Standards
- Specialised in-house team of designers and architects
- Vast designing, technical & execution expertise with over 1300 projects.
- Ability to integrate easily with all traditional construction methods
- Optimized design of steel thereby reducing weight, without compromising on design and quality
- Quality design, manufacturing and erection

Industry Spotlight

Textile

2010 will not have fond memories amongst the members of the textile industry. As the global economy was hit by recession, Indian manufacturers had to go through excessive fall in exports. However with the market slowly opening up this fiscal, manufacturers and exporters are hopeful of a better year to expect.

Penetrating deeper into the domestic market will form to be an important strategic focus area for the textile sector. This is also a learning process for the manufacturers who had to go through heavy trouble after loosing export contracts due to the global recession.

Did you know?

Interarch has executed the largest roofing order in India for the Terminal T3 at IGI airport, New Delhi. The entire structure spans 175,000 Sq. Mt with a 7 layer state of the art roofing system. The terminal, when compared to the size of a standard football field in terms of length & breath, would equal to 1595 football fields put together!

Testimonials

Close Group Interaction organized to create a platform of interaction between the top influencers of Chennai, Interarch Management & local regional sales team.

"We appreciate your effort to bring together the leading personalities in the industry and indeed we enjoyed the interaction during the dinner on 22nd December 2010 at Chennai"

R. Sankar
Director-SSCO

Project Spotlight

Interarch expertise in the sector of Rural Retail

Interarch's exceptional abilities in turnkey design, manufacture, supply and execution of such modular systems, enable it to provide fast and effective solutions to remote projects that require standardized, multiple, modular building execution

Highlights:

- 65 buildings executed for DSCL Hariyali Kisaan Bazaar in U.P, Punjab, Madhya Pradesh, Haryana, Andhra Pradesh, Rajasthan and Maharashtra
- 5 buildings executed for ITC Chaupal Sagar in U.P & Madhya Pradesh
- Average size of building 1500-2200 Sq. M
- Manufacturing & Erection time - 1 week Appox.

Accessories Maintenance Tip: Turbo Vent

The blades of the fan should be cleaned once a year at least as dust gets settled on the fins which obstruct the smooth movement.

Major Projects Wins

1. Kansai Nerolac Paint Ltd in Bawal, Haryana
2. Bharat Seats Ltd in Bhora Kalan, Haryana
3. SMCC Construction India Ltd in Bhiwadi, Rajasthan
4. TATA Motors Ltd in Pantnagar, Uttaranchal
5. Machino Polymers Ltd in Gurgaon, Haryana
6. A.K Automobiles in Rohtak, Haryana
7. Semco Electric Pvt Ltd in Chakan, Maharashtra

Upcoming Events

1. Annual Sales conference scheduled on 4th Feb, 2011
2. International Exhibition on Rice & Agriculture
10th -12th Feb, 2011
Karnal, Haryana
Stall No. B-54
