

Interarch Building Products Newsletter

Vol. 1
October 2010

Dear Friends,

Welcome to a brand new initiative of Interarch. Over the years we have developed our expertise in pre-engineered metal buildings (PEB) and pre-engineered steel construction having worked on some of the most interesting projects of modern India. This newsletter intends to be a window for you into our exciting world of metal building solutions where we will showcase the latest developments in our company as well as the industry at large.

As our valued partners, we are happy to share this first edition of the Interarch newsletter with you and maintain our endeavour to innovate, initiate and integrate value to your business.

Best regards,

Arvind Nanda
CEO, Interarch Building Products Pvt. Ltd.

BUILDING FROM A STRONG FOUNDATION

Interarch was established over 25 years ago in 1984. Within this time the company has evolved from a workforce of 2 to 2000 and is constantly innovating and introducing revolutionary building and construction concepts to India.

We are the first home-grown firm to offer turn key Pre-Engineered Metal Building & Steel Construction Solutions in India with integrated facilities for design, manufacture, logistics, supply and project execution.

Over the years we have had many significant milestones including:

- 1986 - Interarch introduced window covering in India, under brand name TRAC
- 1992 - First in India to introduce engineered metal roofing and cladding systems
- 1996 - Interarch pioneered the Pre-engineered metal building systems in India
- 1999 - Interarch becomes first manufacturer to receive ISO 9001 certification
- 2004 - Executes more than 900 petrol Pump canopies for Reliance Petroleum
- 2006 - Executed complete Greenfield automotive facility for TATA Motors-enters into mainstream automotive construction solutions becoming a leader in pre-engineered solutions for the auto industry
- 2007 - Interarch becomes the single largest turnkey supplier of Pre-Engineered construction solutions in India, in terms of project bank as well as real product capacity
- 2008 - Interarch bagged the largest turnkey supply for DIAL T3-becoming the first homegrown Indian company to enter into a infrastructure projects and heavy pre-engineered structure for world class projects

MONTHLY PROJECT SPOTLIGHT - DIAL T3

Key highlights

- Interarch executed the pre-engineered steel structural roofing systems for the Delhi International Airport Terminal 3 that was recently inaugurated
- This is the eight largest terminal building in the world - with a complex seven layer roofing system executed turnkey by Interarch
- The project was concluded and successfully handed over by Interarch in a record time of 10 months
- The construction process consumed over 8000 MT of steel laid over 1.2 million square meters of roofing material
- The companies safety practices are testimony to the completion of 2,50,000 accident free man hours on this project

EXPERT CORNER - TECHNOLOGY MAKES NEW WAVES IN BUILDING CONSTRUCTION

"Having spent the last twenty five years building Interarch from strength to strength, the one common theme for us has been to offer cutting-edge technology resulting in innovative building methodologies.

Over the years we have experimented with building technologies which have revolutionised the industry across the world. Pre-Engineered Building solutions offered by Interarch have been crafted from a holistic perspective. Right from the engineers drawing board to the final steel structures, our solutions are created with the highest level of precision to the point where all one needs to do on-site is to literally only assemble all the parts.

Such technology enables many end benefits including speed of construction and hence the economic usability of the structure as well as quality and endurance of the structure itself.

We intend to further strengthen our technological innovation and work towards building the "MODERN INDIA"

Mr. Gautam Suri
CTO & Director - Interarch Building

INTERARCH NEWS

Interarch sets up fourth manufacturing facility in Sriperumbudur (Chennai)

The new facility hails of an investment of over INR 10 Cr. with a total manufacturing capacity of 30,000 Metric Tonnes. The new factory location will cater to the growing demand for PEB in the Southern region. Apart from this facility, Interarch has manufacturing units in Noida and Uttarakhand.

Interarch launches new website

As part of our endeavour to constantly innovate and integrate, we have created a brand new website which is extremely rich in content and dynamic. It showcases a vibrant variety of work and expertise offered by the company in an easy-to-navigate format.

Visit us at - www.interarchbuildings.com and tell us what you think.

Sales network expands

We are constantly enhancing our national capabilities by reaching out to new regions with growing as well as potential demand for PEB solutions across various industries.

Basis this, we are now present in over 18 cities across India. Recently we have opened sales offices in Chandigarh, Ahmedabad and Baroda.
