Future Outlook of FMCG* Sector:

The consumer durables market is expected to reach US\$ 12.5 billion in 2015 and US\$ 20.6 billion by 2020. Urban markets account for the major share (65 per cent) of total revenues in the consumer durables sector in India. There is a lot of scope for growth from rural markets with consumption expected to grow in these areas as penetration of brands increases. Also demand for durables like refrigerators as well as consumer electronic goods are likely to witness growing demand in the coming years in the rural markets as the government plans to invest significantly in rural electrification.

The FMCG sector has grown at an annual average of about 11 per cent over the last decade. The overall FMCG market is expected to increase at (CAGR) of 14.7 per cent to touch US\$ 110.4 billion during 2012-2020, with the rural FMCG market anticipated to increase at a CAGR of 17.7 per cent to reach US\$ 100 billion during 2012-2020. Food products is the leading segment, accounting for 43 per cent of the overall market. Personal care (22 per cent) and fabric care (12 per cent) come next in terms of market share.

Size of the consumer durables market (US\$ billion)

Interarch Light Buildings for Mezzanine

Interarch Light Buildings system has got un-matched advantages over the conventional construction system. The mezzanine floors in industrial buildings offer the flexibility of providing additional floor space without extending the overall size of the building. They can be part of a new building construction, or as an upgrade to an existing building.

Interarch Industry Spokesperson: SR Patil Architects & Consultants, Nashik, Maharashtra

According to Mr. S.R. Patil the size of the Pre-Engineering Building Industry in state will grow as Pre-Engineered Buildings have a wide scope in future and industrial architects, major consultants and architects are aware of what PEB actually is. He feels that the size of steel buildings in Maharashtra region would go up in time to come.

About the scope of Green Buildings in India, there is a very positive upcoming scope of green buildings in India or elsewhere as people are much smarter and intelligent and majority of them go for green buildings. People are considering the advantages and sustainability of green building that why we can say that green building market is lucrative in the coming years.

Upcoming Industries: Changes could be seen in any industry like warehousing, plastics, Automotive etc. as in the mid areas are very good example of how the automobile industry is expanding in Maharashtra.

How has the market for PEBs evolved in India during past few years?

The journey of PEB in India is remarkable in such a short span of time. Sectors such as automotive, power, logistics, Pharma, FMCG, and retail provide huge growth opportunity for PEB in India. Though, it is said that the PEB industry is still in its infancy but, over the last six years there has been a growth in this sector due to increasing awareness amongst consultants and customers. It would certainly not be an exaggeration if we say the industry is catching-up very rapidly. In fact, pre-engineered building sector has started getting its due credit as a

favorable alternative construction methodology in India today. There is undoubtedly, a very promising future for this sector in the coming years.

The Indian PEB market is now experiencing a demand shift to new applications due to infrastructure development in the country like airports, multi-story buildings, stadiums, Metro Stations etc.

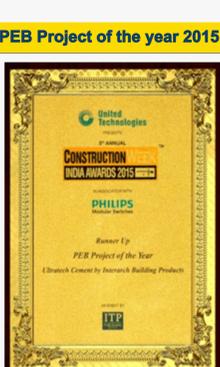

Customer Testimonials

We appreciate the effort put in by their team at stages, resources deployed and cooperation extended for the satisfactory and timely completion of this project. We wish them success for their future assignments.

For M/s. IPCA Laboratories Ltd.

Best PEB Project of the year 2015
